EDUCATION & PROFESSIONAL DEVELOPMENT

Aptech — *ACCP Prime 2.o*

2021 - OnGoing

I am currently learning software development and maintenance at Aptech University road. Here I am pursuing a diploma in Software development. Currently, I am in my second semester in which I am learning Back-End development with PHP and Laravel.

Hong Kong University Of Science & Tech — *Front-End Framework: Bootstrap*

August 2020- October 2020

I learned Bootstrap, a Front-End framework from the Hong Kong University of Science & Technology. Here I also learned about distributed version control, node package manager, and more.

The University Of Michigan — *Introduction To Web Development*

September 2019- January 2020

I learned HTML5, a Front-End markup language from the University of Michigan. Here I also learned about Web styling with CSS, Web Interactivity with JavaScript, and more.

EXPERIENCE

Innovegic— *WordPress Website Developer*

Jun 2021 - September 2021

I Created a Fully-Responsive WordPress website. I used many different plugins and resources for this project.

Imend— *Shopify Website Developer*

December 2020 - March 2021

I Created a Professional and Fully-Responsive Shopify website with a custom theme.
